

*530.12 Junkyards.* All junkyards existing at the effective date of this Code, within one year thereafter, and all new junkyards, where permitted, shall comply with the following provisions:

- A. From and after January 1, 1964, no person, firm, or corporation shall operate or maintain in the county any junkyard, motor vehicle wrecking yard, or used car parts business unless and until the same shall be enclosed by a fence, the construction of which will obscure the view thereof by the passing public. The said fence shall be of a height not less than eight feet, and all of the operations of such business shall be carried on and conducted within the enclosure of such fence.
- B. All junk shall be stored or arranged so as to permit access by fire fighting equipment and to prevent the accumulation of water, and no junk pile shall reach a height of more than eight feet unless it is 200 feet from any property line.
- C. No oil, grease, tires, gasoline, or other similar material shall be burned at any time, and all other burning shall be in accordance with applicable state and local regulations.
- D. Any junkyard shall be maintained in such a manner as to cause no public or private nuisance, nor to cause any offensive or noxious sounds or odors, not to cause the breeding or harboring of rats, flies, or other vectors.
